

What's New in NovaBACKUP

19

Rapid Restore Speeds (Up to 4X Faster)

A backup is only as good your ability to restore from it, and the new NovaBACKUP 19 offers up to 4x faster restores without compromising reliability. The newly developed logic builds an index into your backups for the fastest backup import speeds ever.

Advanced Data Verification

We could all use a little bit of extra insurance, and with a new Advanced Data Verification, those who want 100% assurance that data has been properly secured through a detailed block-by-block verification process now have that ability.

Parallel-File Backup

A growing business creates an ever-increasing volume of data, making the narrow window of time you have to complete backups even more important. NovaBACKUP utilizes new functionality to backup files in parallel, saving critical time without compromising data integrity.

NovaBACKUP Monitoring Console (CMon)

A newly updated central monitoring application provides instant status of backup jobs via your Internet browser of choice or mobile application. The CMon is available to NovaBACKUP users as a FREE download.

Features and Updates

NovaBACKUP® Business Essentials <i>advanced server protection</i>	NovaBACKUP® Server <i>windows server protection</i>	NovaBACKUP® PC <i>single workstation and laptop protection</i>
