Backup and Disaster Recovery Appliance for Managed Service Providers

Optimized, turnkey BDR solution as a service that includes the software and appliance hardware required to protect MSP client data both locally and in the cloud, with flexible pricing options and no upfront fees. One solution protects and stores data for Windows systems, virtual machines, Microsoft SQL and Exchange for a single client - with no limit on the number of agents it can connect to.

NovaBACKUP BDR Essentials **NEW**		
• Includes file and image backup software for remote endpoints and servers with support for MS SQL, Exchange, Hyper-V and VMware. • Centralized monitoring of backups for physical and virtual machines.	• Backup replication to replicate data to an offsite location or to a secondary drive to enable fail over to a virtual machine or to an entire system. • Backup to BDR Appliance (Included), and NovaBACKUP-hosted Cloud.	• Minimize the impact on client systems with an incremental forever strategy. • NovaBACKUP BDR Essentials offers and extensive hardware warranty protecting the device for a full three years.

⟩ **Flexible, secure and professional NAS powered Buffalo TeraStation** - 8, 16 and 32 TB Capacity
⟩ **Pre-configured for RAID, this BDR appliance is ready to use out of the box to reduce data loss and improve performance.**
